Instructions for Use

[Intended Use]
In the glazing and porcelain operation, it is used to fix the support and avoid the contact between the support nail and restoration.

[Product Description]
The product is a kind of white or milky white paste.

[Instructions]
1. Crown bridge: unscrew the sealing cap, gently push the needle piston handle, push out a soybean-sized amount on the sintering retention pin, or directly inject it into the crown of the restoration, and then place the restoration on the sintering pin.
2. Veneers, inlays, and onlays: unscrew the sealing cap, gently push the needle piston handle, push out a soybean-sized amount on the bottom of the restoration, and then place the restoration directly on the sintering tray.

[Precautions]
(I) Operation: The amount used each time should not be too much, only the size of a soybean is needed.
(II) Storage: After use, be sure to tighten the lid, seal it to avoid exposure to the sun, and store it at 5-25℃.
(III) Usage:
1. After sintering, the Firing Paste appears as a white mass, and there may be a little adhesion to the restoration. Use a vibrating cleaning agent to clean it in time.
2. The amount of Firing Paste filled in the restoration should be appropriate to prevent the Firing Paste from contacting the external dye paste at the edge of the restoration to destroy the external dye effect.

[Shelf life] 3 years

[Symbols for use in the labeling]

	Batch code		Consult instructions for use
	Temperature limit		Manufacturer
	Caution		Use-by date
	Keep dry		Country of manufacture

MD	Medical device		Keep away from sunlight
UDI	Unique device identifier	Rx ONLY	Caution: U.S. Federal Law restricts this device to sale by or on the order of a dentist or professionals.
